To Whom It May Concern:

We are owner builders in New York City specializing in residential construction. We have two buildings that are at different stages of construction in which we utilized the services of Ziggurat Solutions.

Ziggurat's team worked closely with us and with our architects and engineers via the internet as well as in person. Their services were invaluable to the coordination process and we could not envision embarking on any future projects without their help.

The benefits we received were basically in two areas, structural and MEP conflicts. The first project Ziggurat helped us on had a very complicated concrete structure and without the 3D models Ziggurat provided us with, as well as their hand holding of us and the consultants, we would be stuck today with unsolvable problems. By utilizing their 3D models we were able to identify MEP conflicts in the design/shop drawing stage thereby minimizing the inevitable removing and relocating that typically happens at the job site.

In conclusion, we enthusiastically recommend Ziggurat both for their technological and personal skills. If you need further information I would be happy to discuss it with you.

Sincerely,

Barry S. Gurvitch, R.A.
Chief Architectural Officer
